GILMANDYKE ANGUS

SPRING BULL SALE

THURSDAY 22ND AUGUST 2024 • 1PM

120 STUD ANGUS BULLS + 100 COMMERCIAL ANGUS PTIC HEIFERS
50 COMMERCIAL FEMALES WITH CALVES AT FOOT
+ 20 REGISTERED ANGUS HEIFERS

IT'S A SIGN OF BETTER PRODUCTIVITY AND ANIMAL HEALTH

'Immune Ready' is a guideline for the care of sale cattle. It helps protect cattle in the preparation, transport and arrival post sale.

FOR BUYERS

- It reduces the risk of disease in purchased cattle
- It improves farm biosecurity
- It improves animal health and welfare

FOR SELLERS

- It prepares your cattle for potential disease challenges
- It allows you to promote and sell premium cattle
- It helps safeguard against disease and improve productivity

SPRING BULL SALE

THURSDAY 22ND AUGUST 2024 • 1PM

120 STUD ANGUS BULLS + 20 STUD HEIFERS
100 COMMERCIAL ANGUS PTIC FEMALES
50 COMMERCIAL FEMALES WITH CALVES AT FOOT

Welcome to the Gilmandyke Bull and Production Sale for 2024

Welcome to the Gilmandyke bull and production sale for 2024! We are proud to present to you our sale draft this year. The bulls and females on offer are a perfect representation of our breeding philosophy and the foundation of our herd. We pride ourselves on producing the highest quality of livestock that we believe are best suited to the various Australian beef production systems. Consistently our large-scale commercial program provides stability and continues to influence the direction of our stud breeding program.

Our sale this year will see 120 bulls offered across three age groups: 2-year-old bulls, 18-month-old bulls and 12 month old yearling bulls. The bulls on offer have been bred for their commercial relevance for not only our herd but for our customers. With the long-term future of the beef industry in mind, every breeding decision centres on increasing genetic gain potential, fertility, and longevity.

Sire lines this year include 40 sons of Dunoon Prime Minister P758 who has seen significant use throughout our entire herd. Lawsons Rocky R4010, Sterling Pacific 904 and Gilmandyke Revolution R10. Along with new sire lines including Baldrige Versatile, Knowla So Right S48, Sterling Confidence Plus 804 and Gilmandyke Striking S9. It is very satisfying to see the promising advantages of the next generation coming through the program.

We recognize the need for variation in bull selection to meet specific market requirements and breeding objectives. This year across the 120 bulls, 65 bulls are suitable for heifer mating, 90 bulls exceeding breed

average for growth, 80 bulls surpassing breed average for docility, and over 65% of the draft demonstrating superior performance in various carcass traits compared to breed averages.

The strength and selection pressure we place on our cows, combined with the use of superior sires, continually enhance the quality and depth of our sale draft. Several bulls featured in the sale have been collected and utilized within the Gilmandyke stud and commercial AI programs.

Females have always been the primary focus of our program, and this year is no exception. We are excited to offer 20 registered yearling stud heifers, including a special Angus Foundation Donor heifer lot. These heifers will be sold open, ready for a mating of your choice in the spring.

Additionally, we have a consistent lineup of 100 PTIC (Pregnancy Tested in Calf) heifers selected from the top end of our commercial herd, chosen with the same rigorous selection process as our replacement heifers. We are also offering 50 first-calf females, selling open with a two-month-old calf at foot. These females are backed by decades of strategic breeding decisions and performance measures, ensuring that only the best are retained and offered.

On behalf of the Bateman family and the Gilmandyke team, we look forward to seeing you on sale day.

Wade Peatman
General Manager

Peter McNamara
Stud Manager

REBATES & DISCOUNTS

5% Rebate

We are pleased to offer a 5% rebate to all agents who attend with or on behalf of their clients and settle within seven (7) days.

\$500 Discount

We are pleased to offer a \$500 discount on a bull purchase when combined with the purchase of a female lot.

FREE Delivery

Gilmandyke Pastoral will deliver Bulls free of charge to the Regional Livestock Exchanges in Yass, Carcoar, Forbes, Dubbo and Tamworth.

EFTPOS: For the convenience of our buyers B&L Livestock will have EFTPOS facilities on the day; accepting Visa and Mastercard.

ONLINE BIDDING AND LIVESTREAMING

AuctionsPlus will facilitate livestreaming and online bidding on the day. Please register with B&L Livestock and use your AuctionPlus account to access the sale.

SALE INFORMATION

Sale Location

Gilmandyke Pastoral Stud is located at
"Kangaroobie" 1346 Mitchell Hwy, Orange NSW.

Time

Time of sale 1.00pm.

Inspection

Inspection from 10.00 am on sale day.
Inspections at any other time are welcome.

Refreshments

Morning tea and a light lunch will be available.

Insurance

It is our recommendation that insurance is taken out on all purchases. Representatives will be available on the day.

Health

All bulls have been ear notch tested free of Pestivirus (BVDV). They have been vaccinated with 2 doses of Pestiguard, 2 doses 7 in 1 and 2 doses of Vibrovax. AM, NH, CC, CA and DD status is shown in each lot heading. No bulls on offer have had any feet treatment. All sale bulls are vet inspected for structure and breeding soundness.

Guarantee

Gilmandyke Pastoral guarantees the structural soundness and fertility of the bulls for a period of six months after the sale. If a bull is proven to be infertile or unable to serve (providing not related to injury or disease) Gilmandyke will credit purchase price of bull less salvage value.

Whilst Gilmandyke has carried out every precaution with the working abilities of the bulls, we are here to help if there is an issue with your purchase. Please contact us immediately if there is a problem so we can attempt to rectify.

Multiple Bull Purchases

The bulls in this year's sale have been run in three separate groups to minimise injury, if planning on making multiple purchases please discuss with Gilmandyke staff to find out if bulls are from same mob.

Delivery

Gilmandyke Pastoral will deliver bulls free of charge to the Regional Livestock Exchanges in Yass, Carcoar, Forbes, Dubbo and Tamworth.

Bull Transfer

Bulls will incur no charge for transfer.
Please provide herd prefix on registration.

Safety

We select animals with traits of good temperament and ease of handling. However, all animals can be unpredictable, particularly if stressed.

Visitors enter pens at their own risk.

- Children are not permitted in the pens
- Do not overcrowd the pens
- Keep movement and noise to a minimum
- Be aware of your surroundings

Semen Rights

Gilmandyke Pastoral retains the right to collect up to 1500 straws of semen from all bulls sold. Gilmandyke Pastoral will collect the semen by agreement with the bull owner at Gilmandyke Pastorals' cost. This will be for Gilmandyke Pastoral use only.

Disclaimer

People entering upon this property for any purpose whatsoever, including attendance at cattle auctions, do so at their own risk. We are not liable to you for any personal injury or death suffered by you or for theft, loss or damage to any property caused or contributed to by us or any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners, their employees, contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied, no responsibility is accepted for any errors which may have occurred. Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder nor owner of the animal. JOIN THE GILMANDYKE PROGRAM

GILMANDYKE THOR T265

GILMANDYKE 38 SPECIAL R76

The Gilmandyke commercial program is the cornerstone of our entire operation. This large-scale initiative of 3500 cows is managed with meticulous attention to detail and rigorous evaluation of our breeding females. Our management strategies are crucial in achieving our objective of breeding 'functional females.'

From the outset, a replacement heifer must meet several criteria: easy birth, rapid growth, sound structure, and good temperament. She must conceive within a six-week joining period, maintain her pregnancy, calve without complications, sustain her body condition while nursing her first calf, mature into a productive cow, successfully rebreed, and wean a healthy calf. This cycle, repeated over several years, defines what we call a 'functional female.'

Our 2024 lineup of commercial females is exceptional. Over the past 12 months, they have matured into productive females. A good percentage of heifers are PTIC (Pregnancy Tested in Calf) via artificial insemination to the \$25,000 top priced yearling bull from 2021 who sold to Currowar Angus. These heifers are due to start calving on October 21st, 2024. The remaining heifers are PTIC to low birthweight Gilmandyke herd bulls. Further details about individual lots can be found on Auctions Plus, on the provided supplementary sheet on sale day or the individual pen card details on sale day.

This year, unlike previous years, we will not only offer 100 PTIC females but also 50, 2yr old commercial females with calves at foot sired by Thor T265 (\$45,000 top-priced bull from 2023, who sold to ABS Global - Australia Beef and Ascot Angus QLD). These females are open and ready to breed.

Gilmandyke Thor T265 boasts a pedigree well known in the industry. He is sired by Sterling Pacific 904 and descends from the prolific Emillesque female line at Gilmandyke on his maternal side. Along with his esteemed pedigree, Thor offers a unique blend of data that drives key profit traits in calving ease, fertility and high carcass quality. His first calves have hit the ground in the stud and commercial herd, they were born easily and are growing well, we are eagerly awaiting the spring where we have another 200 calves due from him. We're thrilled to provide you the opportunity to incorporate these exceptional genetics into your herd.

Gilmandyke 38 Special R76 has delivered great success in his progeny over the last 3 years. His calves are born easy and grow quickly to become recognised as some of the better progeny in their weaning groups. This is the second time R76 has featured in this sale heifer mating, we trust him to continue to perform for us. He is a 38 Special son, out of our Eva cow family. He offers a high performing balance of data combining low birth, high growth, good docility and impressive carcase performance.

First cab off the rank and a top quality one at that. We have retained a full brother in the commercial herd this year. A nice powerful bull to kick the sale off. Eva R38 has done a great job in the donor pen and we're very happy with her progeny coming through the herd. Suitable for use over heifers.

There is a good run of Rocky sons in this sale draft and U83 is a great one to kick them off. A soft skinned Rocky out of an old donor cow Eutesca G0272. He has good neck extension and nice angles through his shoulder, right through to his hip. Very positive fats and suitable for use over heifers.

U176 is an exciting young bull, he is the first Versatile son to sell in this sale draft and to say we're happy with how they perform would be an understatement. We have collected this bull and used him in the Autumn stud program. U176 will be on our list of bulls to use in the Spring stud and commercial programs. He is a bull with plenty of muscling, suitable for heifer mating and impressive carcass EBV's. His dam Dream S199, Granddam Dream P5 and Great Granddam Dream K42 have all been respective donors in our program. Note his soundness, docility and IMF. Semen retained for stud and commercial herd use. Suitable for use over heifers.

Strong maternal line in this bull. Emillesque P243 has been one of our best performing cows in the past 3 years. This natural Shotgun S36 calf has been a powerhouse from the day he was born. Soundness and overall balance are this bull's best attributes, He is very hard to fault. Suitable for use over heifers.

A very impressive bull to kick off the 2yr old sale draft. This pedigree combination has worked so well for us at Gilmandyke. I have retained a full brother for stud duties who is currently out with heifers. A full brother sold in last year's sale as a yearling for \$16000. T282 is such a well-made bull with a huge amount of capacity and muscle expression, offering a stylish outlook and superbly balanced. Suitable for use over heifers.

A great topline and overall muscle pattern in this bull. He brings a nice array of EBVs to the equation, with extremely low birth weight, top 2% docility and well above breed average for structure along with many more. Suitable for use over heifers.

T404 is a bull which was flushed from a Kennys Creek Finks Mist D384 cow that is owned by the Jacksons of Bell Hill Angus. Jack Newham and I (Pete) selected a cow out of their herd to flush 4 years ago and this bull is a result of that genetic selection. The fundamentals are all right in the cross. Long bodied, strong topped with a nice square hip. A no fuss commercially focused bull.

A great combination of genetics in this bull. I like how So Right has complimented our herd and to combine him with our most reliable cow Dream N314, to produce this outcome is very pleasing. U337 has a great top line and carries plenty of positive carcase traits. Suitable for use over heifers.

U244 is Wilcoola N275’s first son to sell in the draft, her second is at lot 103. This bull has a brilliant amount of body depth and capacity. Plenty of body length and muscle expression. I think this young bull will do a brilliant job breeding females in any production system. Suitable for use over heifers.

U41 has a very interesting pedigree, the combination of PM and 38 Special with one of our matron donor cows Eutesca W131 has come together nicely. He is a great example of genetic progression and how a little bit of old genetics can often work very nicely in the new age. Note his impressive combination of EBVs, in particular his carcass traits. Suitable for use over heifers.

Eloxa J0146 has been a cow that has been very popular in our program here, she has bred top sellers along with super productive females. This bull will be one of the last direct progenies out of this old matron cow, the combination of J0146 and Pioneer P182 has been, in our opinion, her best mating yet. A powerful, thick topped and docile bull. Offering a substantial amount of bone, capacity and carcass. Suitable for use over Heifers.

ANGUS FOUNDATION DONOR HEIFER- U342 has been selected out of the top 20 spring born heifers at Gilmandyke for 2023. Her Dam, Eva N206 has been a top donor cow in our program over the past 3 years producing several sale bulls. She has an impressive total of 7 lots to be sold in this sale. U342 expresses great functionality, the combination of her maternal and impressive performance traits are rare to find in an individual. Her sire Baldridge Versatile is breeding with great reports throughout our Gilmandyke herd and the Angus community. It is a great privilege to be able to offer a donation that supports Angus youth development. Youth development is a fundamental pillar of success at Gilmandyke, something we pride ourselves on.

Prime Minister, the top-selling bull from Dunoon Angus in 2020, commanded an impressive \$140,000 and claimed the title of highest-selling Angus bull for that year. Renowned for his exceptional top-end performance and elite genetic profile, he excels in thickness, capacity, docility and overall structural soundness.

The \$250, 000 USD son of Blackbird A030 who has written her name into the history books at Baldridge. Maternal brother to the high use sires Alternative and Command. Highest scan IMF bull ever to be produced at Baldridge, recording 8.2% at 12 months of age. He is a long and deep bodied bull that is free moving and expresses great sire appeal. He stands and moves square to the ground with good feet and base width.

So Right was the \$190, 000 selection at the 2022 Knowla Livestock Production Sale. So Right has a tremendous amount of spring and depth of rib, stoutness and muscling, all being clean fronted with a great ability to move effortlessly with presence and eye appeal. When you analyse the phenotype and structure of the bull, his amazing temperament, the cow power behind him, and the data set he brings to the table, So Right S48 is a complete package.

Revolution R10 was a bull we retained in 2021. He had superior calving ease, docility, carcass and structural soundness traits along with the combination of the Bara K15 cow family that is so popular within the Angus breed. He has performed effortlessly throughout the commercial herd and to this day remains a walking sire in the Gilmandyke Stud herd.

Striking S9 is one of the great Pioneer P182 sons. His calving ease to growth is very impressive. This sire group in the commercial herd at Gilmandyke have been consistent stand outs, with the first steers being sold in the most recent 2023 Autumn weaner sales at CTLX and the first heifers lining up for our replacement joining program in the spring.

Sterling Confidence Plus 804 rose to the top at Snyder's Bull Test in 2019. He was #1 for ADG at 2.41 Kg/day, #1 for RFI at -3.84 and #1 for FCR at 4.51:1. He is a moderate framed, easy fleshing bull. His temperament, fertility and eagerness for his job have made him a favourite at the semen collection facility. He is a good footed, free moving, sound bull.

FOUNDATIONS OF BEEF

Written by Julia Wythes

The morning sun shines down on the sleek black cattle as they amble in the yards. Between the magnificent Angus cows, a woman wanders in the rising dust, carefully inspecting each female.

Despite being 81 years old, Belinda Bateman's passion for her Gilmandyke Angus cattle hasn't diminished. It was a dream begun by Mrs Bateman and her late husband Edmund, and has produced some truly spectacular cattle over the decades. And her general manager Wade Peatman and stud manager Pete McNamara are making sure this passion is carried into the future.

The Batemans' journey of breeding cattle first began in 1971, when Edmund and Belinda bought their first property at Triangle Flat near Rockley, NSW.

But it wasn't long before they were producing head-turning stud cattle - starting with Murray Greys, as well as Charolais and Salers. Their name was synonymous with Murray Greys.

"Murray Greys were huge during the 1980s and the Batemans were the people to beat at Sydney Royal," Mr Peatman said.

"They won the Hordern All Breeds Trophy a number of times. They were a pretty unstoppable force in the stud game."

In 1993, they expanded the operation with the addition of Kangarooie and Tantallon in the high country near Orange, NSW.

"This was the start of the expansion into the Orange region and building what is now almost 3600 hectares at Orange," Mr Peatman said.

Over the next decade, they grew their dynasty even more. Today they run 8000ha across the region, including Orange, Molong, Rockley and Harden, as well as some country at Bowral.

Despite their love of Murray Greys, their move to Angus was very deliberate.

"The cow herd was Murray Grey-based, but the Angus influence had changed markets - market accessibility was far better with Angus. Rather than giving up on 50 years of breeding Murray Greys, we made the decision to convert the herd to black," Mr Peatman said.

Gilmandyke bought its first registered Angus females in 2006 at the Narrangullen Angus herd dispersal.

"There was around 100 years worth of breeding in that herd, and they were the 86 foundation females we bought," Mr Peatman said.

Gilmandyke registered its own first stud females in 2007, keen to breed its own bulls.

"The primary focus was to breed 30 or 40 bulls for ourselves. Our commercial herd is our biggest client still to this day, and it comes first. But as we expanded, we moved into the stud market," Mr Peatman said.

From the beginning, females were the key.

And this has stayed constant throughout the years - something Mr McNamara is very proud of.

"The family has maintained the same philosophy of breeding cows its whole life," he said. "They have been strong-headed about it, because they are so passionate. The functionality of a fertile female is what has carried them through. We've always been focused on having a fast-growing animal."

Mr McNamara said as Breedplan developed and traits were

recorded, the stud had been able to hone in on docility and structure.

Both Mr McNamara and Mr Peatman enjoy the tradition of working with Belinda and learning from her.

"I like going through a mob of cows with Belinda," Mr McNamara said. "She will tell you which is a beautiful cow. It's what means the most. You couldn't do it without them."

Edmund passed away a decade ago, but his passion has lingered.

"It was a real passion for him to breed and be successful," Mr Peatman said.

"I can still remember spending time with him in the yards. He was an extremely busy man, with huge businesses outside the agriculture sector, but he still found the time."

Mr Peatman said the resilience of the Bateman family was astounding.

"I remember a story Belinda tells of being on the road droving cattle just trying to keep them alive during droughts in the 1980s," Mr Peatman said. "She has a brilliant eye for cattle, and there is a real family focus in the stud. There has been a lot of heritage built up by Edmund and Belinda."

But something that makes both men hopeful is the passion continuing on through the generations.

"Behind Belinda, there is a generation coming through that is heavily involved. There is enthusiasm there," Mr Peatman said.

"Even down to the grandkids who turn up and help in the school holidays. There are many years to come."

But the passion doesn't stop with the family.

Both Mr Peatman and Mr McNamara show unstinting dedication and understandable pride in what is being produced.

Today Gilmandyke runs between 3000 and 3500 cows depending on the season, usually sitting around 500 stud cows. But Gilmandyke's properties are run as truly commercial operations, and it's not just cattle.

"We run 3000 to 5000 Merino ewes, we crop about 1000ha of grain and oilseed," Mr Peatman said.

"I love where the herd is today. I think our ability to reach quite a few markets is really important. It gives us flexibility, and we've proven that our cattle can perform on grass, in a feedlot and on the dinner plate."

Mr McNamara is thrilled with the Gilmandyke herd.

The two traits I am most proud of are our docility and structure. For both those traits in Breedplan, our herd average is in the top 10 per cent for the Angus breed.

"We're proud that our cattle are quiet and structurally sound, and that goes hand-in-hand with longevity.

"Looking forward, we are looking forward to introducing some new genetics that are going to stay in line with the fundamentals like structure and temperament, and continue to improve our carcase performance.

"I feel like we've got the herd exactly where we want it. It solidifies that our herd can perform under any circumstances, so we can utilise different traits and be more selective with our breeding programs."

SPRING ANGUS

Written by Julia Wythes

It is a magnificent sight to see sleek black cows grazing the rolling green hills of Kangarooie with their calf by their side.

This is what the team at Gilmandyke Angus is most proud of - productive, fertile, beautiful females that can thrive, raise a calf and get back in calf.

And it is from this wonderful base of females that exceptional bulls are produced, which will be on offer at Gilmandyke's Spring Bull Sale on-farm near Orange this August.

The renowned stud will offer 120 sires, as well as a rare offering of females.

And with more than 50 years of stud breeding experience at Gilmandyke, the carefully-selected draft is certain to turn heads.

Gilmandyke's general manager Wade Peatman and stud manager Pete McNamara are proud to be offering a high standard of bulls to hit the sale ring this year.

The sale will take place on Thursday, August 22, offering 120 magnificent bulls.

This selection will include 25 yearling bulls, 55 18-month-old bulls, and 40 two-year-old bulls. This includes 60 bulls the stud believes are suitable for heifers.

Mr McNamara is thrilled with the consistency of this year's draft of bulls.

"I think they are a really good run of bulls. I believe they are what people would expect in a commercial bull," he said.

"The main sire representations are focused on Dunoon Prime Minister P758, Lawsons Rocky R4010 and Sterling Pacific 904, an American bull we have been using.

"In the yearling bulls, there will be some new sires, including Sterling Confidence Plus 804 and Knowla So Right S48."

Mr McNamara said the performance data accompanying the bulls showed impressive improvements.

The dedication to breeding exceptional females is what sets Gilmandyke apart.

The offering of females at the sale is a massive and rare opportunity for producers keen to buy sought-after Gilmandyke matrons.

Gilmandyke will offer 50 two-year-old commercial cows with their first calf at foot.

It will also offer 100 pregnancy-tested-in-calf commercial heifers due to calve in late September.

Twenty registered stud yearling heifers will also go under the hammer.

"It is an offering of Gilmandyke females that is generally quite rare to get your hands on," Mr McNamara said. "There is a

prospect of purchasing a full-blood Gilmandyke female, so that is exciting."

Mr McNamara said it was a unique opportunity for buyers, given the females up for sale are in calf or already have a calf at foot.

"The work is already done for you," he said.

Mr Peatman said the females were in calf to the top-priced bull from last year's sale, Gilmandyke Thor T265, which was bought in a syndicate by ABS Australia and Ascot Angus.

The calves at foot in the sale are also by Thor.

Females have always been a passion for Gilmandyke.

"We are very proud of our females," Mr Peatman said.

"We like to give people the opportunity to purchase females that we would usually keep in the herd."

He said the genetics that were on offer at the sale were the same genetics used in Gilmandyke's own program.

"We have the same genetics - it's just picking and choosing which ones we keep to perform in our paddock," he said.

"I hope this gives people confidence that these genetics work for us."

Gilmandyke will host an open day on August 1, which is in conjunction with Southern Beef Week.

Pre-sale and private inspections are also welcome.

"We will do our best to accommodate you at any time," Mr Peatman said.

The sale will be held at Kangarooie at 1pm on Thursday, August 22, and will be interfaced with AuctionsPlus. Individual lot videos and photos will be available in the weeks leading up to the sale.

CARCASE MERIT

Written by Julia Wythes

It was a heady sight for Wade Peatman to stand on the catwalk at Carcoar and see an entire run of Gilmandyke steers.

The 1000 head of Angus steers was an unusual sight at CTLX, but for Gilmandyke's general manager, it was a reminder of just how important it is to have a herd that can adapt to changing markets and conditions.

Mr Peatman, along with stud manager Pete McNamara, was proud to see the run of Gilmandyke Angus, Orange, steers performing at the local annual weaner sale.

Mr Peatman believes having flexibility in a herd is crucial, especially when the season isn't playing the game.

"This year we missed out on all the summer and autumn rain that we usually receive, so we made the decision to put 1000 weaners into the Carcoar Blue Ribbon Weaner Sale, which historically we've never done," he said. "We've never sold a run that big. It's usually just 50 head a year. They performed above our expectations."

Angus steers weighing between 220 and 280kg at that sale averaged \$3.86 a kilogram, while Gilmandyke's steers averaged \$4.32/kg, which is 46 cents per kilogram difference.

In the heavier steers, weighing 280-330kg, steers averaged \$3.76/kg, while Gilmandyke averaged \$4.14/kg, a difference of 38c/kg.

"We really like our product, and we like to grow them out as best we can," Mr Peatman said.

Usually 90 per cent of Gilmandyke weaner steers are destined for feedlots.

They are grown out on-farm on a grazing crop of oats, wheat or pasture until they reach 480 to 500kg and then head to the feedlot.

He said in the 12 months prior when there was plenty of rain about, Gilmandyke carried 500 head of weaner steers through to 800kg to be processed through a grassfed program.

Something that makes both Mr Peatman and Mr McNamara very proud is the feedback from the feedlots about how their Angus steers perform.

"Animal health is one thing that always seems to stand out," Mr Peatman said.

"Obviously a death in the feedlot is very costly for them, but treatments are also costly for them in lack of performance, as well as where they can send the animal at the end. We have very minimal health treatments on our animals."

He said retail beef yield was another positive.

"We've certainly changed our breeding objectives in the past five years to keep up the consumers' demand of marbling in the Angus product," he said.

"Last year we custom-fed 450 head of steers to head to Ravensworth Feedlot in Hay so we could follow the program the whole way through.

"We had animals that had marble scores of seven, eight and nine, which is incredibly pleasing to see the change in our breeding program delivering significant results.

"Our job isn't done when a steer leaves our farm - we want our animals to be profitable for the feedlot and for the butcher,"

Mr Peatman said.

"Their profitability comes from how much saleable product they can get out of our animals. Ideally, if they are more profitable, so are we. We're not in a niche market, we're not breeding for a specific restaurant. We aim for commercially-bred relevance, and that's because we are a commercial operation at heart."

"I think it's a natural trait in the Angus breed. It's now through technology that we are able to track it and we are paying attention to it."

Mr McNamara said producing as much quality meat as possible was a priority.

"Lean meat yield and carcass weight go hand-in-hand, and that's going to remain a focus in our carcass breeding objectives," he said.

"We want to maximise the amount of red meat we are producing on a carcass. That all ties back into the feed efficiency conversation that the cattle industry is having at the moment - it is about turning livestock off earlier in the most efficient way possible.

"While intramuscular fat is always going to be in the back of your mind because it comes down to eating quality, I think carcass weight is going to become more of a focus to make our cattle more feed efficient and increase our red meat production."

Mr Peatman is adamant that Gilmandyke animals perform all the way to the dinner table.

Mr McNamara said they were thrilled with how Gilmandyke cattle performed in the Beef Spectacular Feedback Trial last year.

"We ranked sixth for Meat Standards Australia (MSA) eating quality out of 96 teams with an average MSA index of 64.53," he said.

In fact, the feedlots are so happy with Gilmandyke cattle, they call up and ask for them every year.

"It is even to the point when some of the animals have been sold as weaners, I have been in contact with those purchasers of bigger lots because I know that I can get them a spot in the feedlot," Mr Peatman said.

"The feedlots have contacted us asking where our cattle have gone so they can purchase them later on.

"We see the steers as a sideline event to our females, but the steer portion is pulling its weight well and truly in performance."

BRINGING YOUR NEW BULL HOME

When purchasing a bull, care and handling after the sale can be as important as the purchase itself. Looking after your bull well during the Initial stages of his working life may ensure longevity and success within your breeding herd.

Purchase

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled.

Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

Delivery

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

If you use a professional carrier:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

Arrival

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull.

These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice. Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice. Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

Mating new young bulls

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows. Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later. When the young bulls are working, inspect them regularly and closely.

Managing Older Herd Bulls

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability. All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

During mating

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

Northern Australia

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straightbred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

Adaptation

They key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

Purchase in cooler months

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

Change of feed source

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

Managing Cattle Ticks

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember male are more susceptible to ticks than females.

THE RELOCATION &
ONGOING MANAGEMENT
OF ANGUS BULLS.**

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to **www.auctionsplus.com.au** to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:
